

# Introduction to Geo-Chem Middle East

Geo-Chem Middle East is an internationally recognized, independent inspection and testing company with extensive experience in inspection, survey and testing of diverse export/import cargo.

Headquartered in Dubai in Techno Park, near Jebel Ali Free Zone, the company has a global presence with independent offices and affiliates in 17 key markets in the Middle East, North Africa, the Subcontinent, South Asia, Europe and the US. The Dubai operations are complemented by a full-fledged office and laboratory in Fujairah, the world's second largest bunkering location, with Geo-Chem offering specialised environmental testing, bunker fuel testing and finished product testing.

The key differentials of Geo-Chem Middle East are state-of-the-art laboratories based in Dubai and Fujairah for advanced testing services, a strong pool of talented professionals and the geographic presence in all major markets.

**Geochem laboratory is ISO 17025 accredited by ENAS( Emirates Authority for Standardization and Metrology) for lubricant analysis, transformer oil and gas analysis. The scope is covered for standard used oil lubricant analyses (OCM), Transformer oil , Gas analyses and Aviation Fuel.**

**Geochem laboratory is accredited to ISO 17025 by DAC for potable water, waste water and microbiological analysis( food, swimming pool water and potable water).**

Geo-Chem Middle East offers the full range of services including:

**Inspection and Analytical Services:** The roster of specialized inspection services offered by Geo-Chem include marine survey, bunker survey, de-ballasting monitoring, inspection of vessel tanks, de-slopping, loading supervision, draft survey, sampling, and inspection of pipelines.

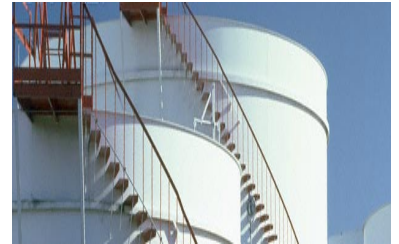

The analytical services cover the entire gamut of products including petroleum and oil products, bunker, lubricants, gas, vegetable oils, food products, potable and waste water, organic chemicals, sugar and molasses, among others.

**Environmental Monitoring:** As part of Geo-Chem's commitment to greener environment, the company offers Environmental Air Quality Monitoring services with a dedicated lab equipped to undertake all meteorological tests.

**Calibration:** Geo-Chem has proven competencies in undertaking the full range of calibration for equipment ranging from viscometers, pressure gauges and thermoprobes to shore-tanks, using advanced equipment.

**Crude Assay:** The company undertakes condensate/crude assay testing. The assay test can be limited to know the various fractions yield or extensive by the characterization of the whole crude and its fractions.

**Collateral Management:** Geo-Chem Group also specializes in offering Collateral Management Services in respect of cargoes imported/exported from various origins and stored in Warehouses under Collateral Management with various Banks

**Consultancy Service:** Geo Chem has a strong track-record in providing specialized consultancy services to several leading international clients across the region. Our expertise includes setting up on-site and off-site laboratories, providing all relevant technical assistance and effectively manning the laboratories.
